

the 111 experience

*of J'lahn (Jala*AN) by Jim Ward-Nichols*

My experience began in 1965.

This is the chronology of my experience with the number One-Eleven (111). It documents my earliest experiences with 111 (CE 1965) through the present day (*see last revised above*). the 111 experience also documents my interactions with the Star-Borne, Solara, the 11:11, and TA-Anua. If there are any questions regarding this work, feel free to contact me through the US Postal System at [REDACTED], Lawrence, Kansas, 66046 or through e-mail at jlwn111@worldnet.att.net. The "copyright" symbol is absent from this material because it may be reproduced (in full or in part) by anyone. It may be distributed (in any format and in any setting) to anyone. Because it is the Truth. Because it is the 111 experience. [REDACTED]

1965 - The Beginning

When I was three years old, I was recorded singing "Old Macdonald" and "Jesus Loves Me" by my grandfather, The Rt. Rev. L. F. Nichols. The recording was made on a SCOTCH reel-to-reel magnetic tape (model number 111-12). The flat, reel-to-reel style tape box cover displays a large, white 111 on top of a red and black checkered background. The tapes were discovered in a box of memorabilia during the summer of 1988 while moving from my childhood home.

1968 - The First 11:11 Connection

One of my favorite childhood "hobbies" was drawing RACING CARS. On one of my earlier renditions, I drew the number 11 twice (Eleven Eleven) on the side of the car. This may be my earliest connection to the 11:11. This was found in a box that contained other kindergarten and first grade drawings and schoolwork in early 1997.

1976 - The Random ID Assignment

I was assigned an ID number of '01110' in the computer systems of the newly opened regional high school. I didn't connect this to **the 111 experience** until the summer of 1980.

July 29, 1978 - The Last Issue of Tabor Lake's THE COURIER

My work has now begun to focus on The Hermetic Order of the Golden Dawn. I am discovering numerous references to Trinities and Trinitization throughout the literature. I have met a person who has introduced himself as Metatron. Metatron is referenced in The Golden Dawn material I have been studying. I am starting to see many connections between The Golden Dawn, all things Masonic, other Egyptian Mystery Schools, the work of Crowley (finding more 111 references throughout his work), the things that Metatron is telling me, The Book of Knowledge/Keys of Enoch, and (most importantly) the work that Solara has been doing all these years. I would like to see Solara meet Metatron. I hope that this will happen at some point. Metatron constantly referred something he called the 'Triple-Beam Dream'. He was also very fixated on the Wiccan/Golden Dawn Three Pillars concept.

I am also looking forward to participating in Solara's Activation scheduled. The really reminds me of 111 (Roman Numeral 3). I renewed my membership with the Star Borne and I am studying the information in the current Starry Messengers and will be ordering some of the back issues that I missed. I really have had some resentment towards Solara and her team over past four years, but I have now come to grips with that and I am realizing that there is absolutely no reason for resentment. I had mis-judged that work that Solara has been doing. I have no business judging her work at all. I should have - and will be - just accepting it.

I'm now confident that my connections to all the number patterns (mainly 111 and 1111) are part of a much larger set of ancient and modern rituals. I will continue to study the materials I have collected over the past 31 years and continue to explore their connections to the bigger picture. I will try to stay humble. And finally, I will start reading Solara's previous books as well as her newest publications as they arrive.

Metatron is an actual entity referenced in literature connected to the Hermetic Order of the Golden Dawn. The individual I had met was NOT Metatron, but was merely posing as Metatron. I would not want Solara to have to deal with this character. I will NOT be trying to get the two of the together.

There are many references to Trinities in all the works connected to the Hare Krishna movement. Although the presence of the Trinities was fascinating to me, I felt that there was something more out there. Something that held the answers to the mysteries I had been experiencing throughout the past 2-3 decades.

I have finally connected with the foundation of my experience. In the late summer my investigations of the Masons, the Golden Dawn and (to a certain degree) Solara's work led me to the common root system that has fed different parts of each cosmology. It is the Cabala: the ancient science of 'revelation' practiced in secret by the Hebrew mystics of old. Some say it has its roots with Moses and his schooling in Egypt. Many look to the 1200's as the actual time period when the Cabala started to become experienced by a much wider audience than the Rabbi mystics who had preserved its teaching in secret for so long.

The Tree of Life contains 10 Glowing Orbs of Light that each stand for a different aspect of the path from the divine above to the kingdom of the Earth and vice-versa. The paths are numbered. THE FIRST PATH IS NUMBERED '11' (ONE ELEVEN). There are 3 Orbs set distinctly in the top part of the Tree and there are 7 set distinctly in the bottom (37 or THIRTY-SEVEN). The concept of the Three Pillars is built into

22/222; 33/333; 37; 444; 47/x47; 55/555; 53; 6/66/666; 69; 7/77/777; 13/42; 23/32; 88/888; all nines; 1234; 1212. For a while the list would expand practically every month. Right now the list has stabilized to the point where I'm not hearing of any additional patterns. Maybe this is a temporary lull. Or maybe I have captured the vast majority of number patterns people are connected to. I am currently tracking 30 patterns.

The movie "Just Cause" with Sean Connery makes numerous references to the number 111.

My work has now begun to focus on the Hermetic Order of the Golden Dawn. I am discovering numerous references to Trinities and Trinitization throughout the literature. I have met a person who calls himself Metatron. Metatron is referenced in The Golden Dawn material that I have been studying. I would like to see Solara meet Metatron at some point in [REDACTED]. Metatron is an actual entity referenced in literature connected with Golden Dawn and several times in Solara's work. The individual that I met was NOT Metatron but was merely posing as Metatron. I would not want Solara to have to deal with this character - he is not REAL. Metatron constantly referred to something he called the "Triple-Beam Dream". He was also fixated on the Wiccan/Golden Dawn Three Pillars concept.

I am starting to see many connections between The Golden Dawn, all things Masonic, other Egyptian Mystery School-based organizations, the work of Crowley (finding more 111 references throughout his work), the things that Metatron is telling me, The Book of Knowledge/Keys of Enoch, and (more importantly) the work of Solara and the Star-Borne. Although Solara has spoken of the New Alpha Point and the need to move beyond the Egyptian stuff, I cannot help seeing the interlocking Triangles of the Golden Dawn, the Star of David, and the Mason's Compass and Right Angle IMBEDDED in the Star-Borne's Zone of Overlap.

I am also looking forward to participating in Solara's [REDACTED] Activation scheduled [REDACTED]. The [REDACTED] reminds me of 111 (Roman Numeral 3!). I renewed my membership with the Star-Borne and am studying the information contained in the current Starry Messengers and soon I will be ordering some of the back issues I have missed. I really have had some resentment towards Solara and her team over the past four years, but now I have come to grips with that. I am no longer concerned with the "ownership" issues surrounding 111 (like, for several years I had felt that something I had pioneered in a time-frame pre-dating Solara was being used by her for personal profit).

I am slowly but surely LOOSENING MY TIES TO DUALITY and beginning to embrace the One Heart. I have come to really respect and appreciate the work of Solara. I have come to realize that this woman is a visionary and that she has taken the experience of simply SEEING 111 and 11:11 into the world of the Invisible. I am grateful that my connections with Solara and the Star-Borne seem to run so deep.

I am still confident, though, that I was one of the first people on Earth to "connect" with a particular number pattern through the modern digital age. My theory is that as more and more electronic digital devices came into being, more and more people started noticing their own particular number pattern more so than other patterns (and it seems that 11:11 and 12:12 still remain the most "popular"). [REDACTED]

[REDACTED] 1995: Co-worker at [REDACTED] and I discover that we have 111 in common. He saw it repeatedly from 1985 through 1990. He is definitely one of my core group that is trying to make sense of the number pattern work.

I finally made a little wallet-sized handout that I could give to people. It lists all the different number patterns that myself and others were connecting to. This is helpful when the topic comes up in conversation - I can show the list to the person and nearly 100% of the time, if they are connecting to number patterns, it is on the list. The list currently shows the following number patterns - 11/111/1111; 22/222; 33/333; 37; 444; 47/x47; 55/555; 6/6/666; 69; 7/77/777; 13/42; 23/32; 88/888; all nines; 1234; 1212; 53. For a while the list would expand practically every month. Right now, the list has stabilized to the point where I'm not hearing of any additional patterns. Maybe this is a temporary lull. Or maybe I have captured the vast majority of number patterns that people are connecting to. I am currently tracking 30 different patterns. The 47 Society (found them on the Internet) in Pomona, CA is 'connected' to the number 47 (4/7 is my birthday). I am creating my own number patterns Web site as a clearinghouse for this type of information. I hope to have it on-line and available to the general public by the end of 1996.

The movie 'Just Cause' with Sean Connery makes numerous references to the number 111.

My work has now begun to focus on The Hermetic Order of the Golden Dawn. I am discovering numerous references to Trinities and Trinitization throughout the literature. I have met a person who [REDACTED] is referenced in The Golden Dawn material I have been studying. I am starting to see many connections between The Golden Dawn, all things Masonic, other Egyptian Mystery Schools, the work of Crowley (finding more 111 references throughout his work), [REDACTED] The Book of Knowledge/Keys of Enoch, and (most importantly) the work that Solara has been doing all these years. [REDACTED]

I am also looking forward to participating in Solara's [REDACTED] scheduled for [REDACTED]. The [REDACTED] really reminds me of 111 (Roman Numeral 3). I renewed my membership with the Star-Bo[r]ne and I am studying the information contained in the current Starry Messengers and soon I will be ordering some of the back issues that I missed. I really have had some resentment towards Solara and her team over the past four years, but I have now come to grips with that and I am realizing that there is absolutely no reason for resentment. I had mis-judged the work that Solara has been doing. I have no business judging her work at all. I should have been - and will be - simply accepting it and learning from it.

I'm now confident that my connections to all the number patterns (mainly 111 and 1111) are part of a much larger set of ancient and modern rituals. I will continue to study the materials I have collected over the past [REDACTED] and continue to explore their connections to the bigger picture. I will try to stay humble and open to new patterns. And finally, I will start reading Solara's previous books as well as her newest publications as they arrive. I know that a great many of my questions will be answered [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

The holy name of God (Tetragrammaton), when written in Hebrew, resembles the Roman number 3 sitting on top of the roman numeral 2. The last path on the Tree is numbered 32.

The entire focus of my work is now on the Cabala. Some of the key concepts promoted through the Cabala have been experienced by me, through REVELATION, since 1965!!! The connections are undeniable. I do feel the need to investigate the origins of the numerology that has been assigned to the Tree. The 22 cards of the Major Arcana in the Tarot are also said to correspond to the 22 paths on the Tree and this needs to be investigated as well

I am still in touch with Solara through e-mail and via the telephone and am still looking forward to the [REDACTED] Activation [REDACTED]

I am also still confident that I was one of the first people on Earth to 'connect' with a particular number pattern. My theory is that as more and more electronic digital devices came into being, more and more people (who had traditionally seen time, for example, on an analog clock) tended to notice their own particular number pattern more so than other patterns (and it seems that 11:11 and 12:12 still remain the most popular). In 1975, I was one of the first people in the world to own a digital wristwatch (it came right off the assembly line at Honeywell). This was the old LED type where you had to press a button to see the time. My early connection to digital timepieces may have something to do with my experience (but then again, the first 'branding' of me by 111 was in 1965!). What still remains unanswered is how the particular affinity develops for one number pattern over another. And why do certain people make this connection and others don't? From Solara's estimates and my own personal observations, it seems as though tens perhaps hundreds of thousands of people are now experiencing their own particular flavor of the 111 experience.
